SEIKO

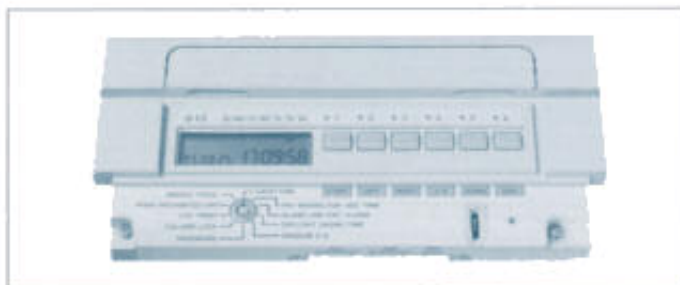

QUARTZ SYSTEM CLOCKS

QR-900 Can Offer a Wide Variety of Time Management Possibilities with High Performance and Efficiency.

QR-900 is a dependable time recorder with a rigid enclosure for any work place, any work schedule and any time card. It can offer the speeding up of clock-in and clock-out lines, help to enforce a time schedule, and encourage good employee relations.

Main Features

- Programmable: accepts almost any time card, any work schedule
- 4 pay periods: weekly, bi-weekly, semi-monthly or monthly
- Auto-feed & auto-eject
- Fast, quiet dot matrix printing (alphanumeric)
- Irregular registrations flagged in red
- Slave clock capability
- Automatic clock synchronization
- 5-year battery backup for memory
- Relay output for external chimes
- Automatic daylight saving time setting
- Perpetual calendar (to 2089)
- Random security check prompt
- Program printout capability
- Printing rejection date (programmable)
- Password for program protection
- Column shift lock function

Simple setting and operation with DIP switches and a rotary switch.
